3. Route tables with correct associations and routes

This screenshot shows the AWS Management Console interface for Route Tables. The left sidebar contains the VPC dashboard and a list of services under 'Virtual private cloud' and 'Security'. The main content area displays 'Route tables (1/4)' with a table listing three route tables. The 'public-route-table' is selected, and its details are shown below, including a list of two routes.

Route tables (1/4)

Name	Route table ID	Explicit subnet associ...	Edge associations	Main	VPC

4. Target Group showing 2 healthy targets

The screenshot shows the AWS Management Console interface for the 'embeddings-target-group' Target Group. The left sidebar contains navigation links for AMIS, Elastic Block Store, Network & Security, Load Balancing, and Auto Scaling. The main content area displays the 'embeddings-alb' Target Group with a summary of 2 total targets, 2 healthy, 0 unhealthy, 0 unused, 0 initial, and 0 draining. Below this, a section titled 'Distribution of targets by Availability Zone (AZ)' provides a table of registered targets. The table has columns for IP address, Port, Zone, Health status, Health status details, Administrative override, and Anomaly detection. Two targets are listed, both with a 'Healthy' status.

IP address	Port	Zone	Health status	Health status details	Administrative override	Anomaly detection
10.0.4.154	80	us-east-1b (...)	Healthy	-	No override	Normal
10.0.3.233	80	us-east-1a (...)	Healthy	-	No override	Normal

The screenshot shows the AWS Management Console interface for the 'embeddings-alb' Load Balancer. The left sidebar contains navigation links for AMIS, Elastic Block Store, Network & Security, Load Balancing, and Auto Scaling. The main content area displays the 'embeddings-alb' Load Balancer details. A notification banner at the top mentions the 'Introducing ALB target optimizer'. Below this, the 'Details' section provides information about the load balancer type (Application), status (Active), VPC (vpc-01508dd680d2a2513), and availability zones (subnet-0c4c9a4b7682058b6 and subnet-03396d9cec9a0001c). The 'Listeners and rules' tab is selected, showing a single listener on port 80.
